PRODUCT INFORMATION BULLETIN

MetaBoost

Water pressure booster and class A/B air break

The **MetaBoost** from Metafix is a compact, low cost mains 240Volt water pressure booster system.

The **MetaBoost** features a compact holding tank and a WRC approved float valve.

The pump has a maximum flow of 40 litres per min and a total head of 40 Metres, through a 1 inch suction and discharge pipe.

MetaBoost also incorporates an electronic, hydraulic flow sensor which automatically turns the pump on and off when water is demanded.

The rear of the tank has a large overflow cut-out and is designed to give a true class A/B air break.

In the unlikely event of a float valve failure, full flood protection is given with our exclusive Aqua-Stop valve.

Operated by a single AA battery (supplied), the **AquaStop** has an external sensor which continuously monitors the overflow and floor area around the **MetaBoost**.

In the event of an overflow or leak the **AquaStop** instantly switches off the mains water supply.

“MetaBoost, a sensible solution to boost water pressure and provide a class A/B air break”.

Features and Benefits

- ◆ *Low cost.*
- ◆ *Easily installed .*
- ◆ *40 Metre head.*
- ◆ *40 litres flow per minute*
- ◆ *Peace of mind automatic leak protection.*
- ◆ *Compact design 61.5 cm High 30.5 cm wide 27 cm deep.*
