PRODUCT INFORMATION BULLETIN

Wash-Control Biocide Wash water bio-slime elimination

“No more slime in your processors wash water!”

Wash control biocide from Metafix is a full spectrum biocide to ensure your processors wash bath is kept free from algae and bio-slime build up.

Processor wash tanks are always prone to bio slime build up because of the inherent dark warm environment of the inside of the processor.

Because many processors are fed from header tanks bio slime is forming before the water even reaches the processor.

Wash Control can save hours of time spent cleaning the processor and help keep drains clean saving pounds.

Wash Control can be manually dosed by hand or automatically with one of our dosing systems.

A unique feature of Wash control is the availability of Blend A and Blend B.

By alternately supplying two different blends the bugs cannot get used to a particular biocide ensuring a lower dosing rate and economical use.

Wash Control is supplied in 1000ml bottles as a standard and super concentrate.

With Super concentrate making 20 litres of working solution, Metafix Wash Control has to be the most cost effective biocide available.

The result is a clean processor wash tank and cleaner drains.

Features and Benefits

- ◆ *Economical to use*
- ◆ *Hand or automatic dose*
- ◆ *Keeps wash baths slime free ensuring clean film output*
- ◆ *Highly efficient Super concentrate saves high shipping costs*
- ◆ *Two blends A & B available to prevent bug immunity.*
